What Is the Combined Gas Law? The combined gas law makes use of the relationships shared by pressure, volume, and temperature: the variables found in other gas laws, such as Boyle's law, Charles ...Pump gas molecules to a box and see what happens as you change the volume, add or remove heat, change gravity, and more. Measure the temperature and pressure, and discover how the properties of the gas vary in relation to each other.15) Acetylene gas,  $C_2H_2$  is used for welding. A 5 liter supply of acetylene being stored at  $-23\text{ }^\circ\text{C}$ , exerts a pressure of 5 atm. At what temperature would the same number of moles of acetylene, moved to a 10 liter container, produce a pressure of 2 atm?You must be familiar with the ideal gas law and its equation in order to solve some problems. Test your understanding of this law using a short and...
