

Download Less Than Crazy Living Fully With Bipolar Ii No 2

Anonymous said... Our son has schizophrenia and has been living with us for 5 years. He is 35 and we are in our 60's. We have tried many ways to get him to accept his illness and treatment and he refuses. Borderline personality disorder (BPD), also known as emotionally unstable personality disorder (EUPD), is a long-term pattern of abnormal behavior characterized by unstable relationships with other people, unstable sense of self and unstable emotions. There is often dangerous behavior and self-harm. People may also struggle with a feeling of emptiness and a fear of abandonment. Why have bipolar disorder symptoms, once fairly rare, become so pervasive today? This article looks at factors behind this increase. Toxoplasmosis is a parasitic disease caused by *Toxoplasma gondii*. Infections with toxoplasmosis usually cause no obvious symptoms in adults. Occasionally, people may have a few weeks or months of mild, flu-like illness such as muscle aches and tender lymph nodes. In a small number of people, eye problems may develop. In those with a weak immune system, severe symptoms such as seizures and poor ...
