

# **Download Skills Study Guide Biodiversity Environmental Science**

For those keen to study a subject that touches on many of the biggest challenges for the world today, environmental science degrees are a good starting point. Environmental science incorporates the study of the physical, chemical and biological processes that take place on the Earth, as well as the social, political and cultural processes which impact the planet. In this lesson, you'll learn about the biodiversity that makes up a desert ecosystem. You will discover what makes a desert a desert and study the different plant and animal life that inhabit both ... If you want to make a difference and change the future of the world in which we live for the better, and if you are inspired by the natural environment and its myriad interconnections and feedbacks, then environmental science is the subject for you. For the purposes of this guide... The term citizen science is restricted to studies of biodiversity and the environment, and is defined as volunteer collection of biodiversity and environmental information which contributes
